

PAN MIXER

DZ 120V

The classic

The most popular of our high-performance pan mixers offers impressive functions in both a stationary and mobile design. The special feet and the installed toggle lever mechanism provide safe positioning, and the pneumatic tyres ensure optimum mobility.

A particularly long lifespan and robustness are guaranteed by the drum cladding made of 5 mm highly wear-resistant steel and the solid underframe.

The maintenance-free gears and the adjustable mixing unit parts made of Hardox steel ensure excellent mixing results for fine and coarse grained mixtures with a grain size of up to 32mm. Almost all materials can be mixed using this universal mixing unit without an additional special mixing unit.

Quick drainage is carried out via a segmental valve in the base of the drum.

Our CE-compliant high-performance pan mixers impress thanks to state-of-the-art, extremely robust construction and special safety devices, such as the hinged protective grid with linked limit switch or the drainage protection grid.

	DZ 120V MOBILE	DZ 120V STATIONARY
Item no.	10727	09298
Motor	400 V, 4.00 kW	400 V, 4.00 kW
Gearbox	61 1/min	61 1/min
Drum capacity	196 l	196 l
Mixing amount	120 l	120 l
Overall height ready to be moved	1295 mm	-
Overall height ready for mixing	1325 mm	1315 mm
Overall width	935 mm	965 mm
Overall length	1685 mm	960 mm
Drum diameter	796 mm	796 mm
Drum height	400 mm	400 mm
Filling height	1325 mm	1315 mm
Drainage height	630 mm	630 mm
Weight	272 kg	277 kg
Paintwork	RAL 1013	RAL 1013
Tyres	Pneumatic tyres	-
Miscellaneous	Hinged protective grid	Hinged protective grid
